

ABSTRACT

Miniature Microphone with Improved Wind Protection

The invention relates to a miniature microphone with a microphone capsule (11) mounted in a microphone housing (12), wherein the microphone housing (12) has front sound entry openings (14) leading to a front volume (16) and rear sound entry openings (15) leading to a rear volume (17), and wherein the front volume (16) is in communication with front sound entry openings of the microphone capsule (11) and the rear volume (17) is in communication with rear sound entry openings of the microphone capsule (11).

The invention is characterized in that a connecting volume (18) is provided between the front volume (16) and the rear volume (17).
